

# MAT WASHING SERVICES

Strad's mat washing services address strict environmental concerns when renting used mats or moving mats from one piece of land to the next on a project.

When working in sensitive environments, mat washing helps stop the spread of noxious weeds or soil disease.

Strad has positioned our state-of-the-art mat washers to cover off a large operational area of Western Canada. If hauling mats to one of Strad's mat washing units is not an option, Strad has the ability to mobilize to your site and clean a variety of wood access mats.

In addition, we provide manual washing services in multiple Strad yards for wood access mats, rig mats, and crane mats.

## MAT WASHER FEATURES

- Ability to wash 450 mats in a 12-hour period
- Portable system that can be setup in any location across Canada
- Closed loop water system
- Mechanically scraped and fully washed and disinfected mat cleaning services
- Automatic feed and stack system to increase efficiency and safety on site
- 100% containment of the mat washer by using a liner to contain over spray
- Service various mat types: flat top, grooved top, laminate
